

Adam Shrimpton

Programmer

Experience

November 2024 – Present

Student Demonstrator - University of Staffordshire

Helping students in Level 4 programming modules to progress by assisting with queries about problems they have encountered in their work and explaining what has occurred and how they can fix the problem.

June – July 2024

Lead Programmer - University of Staffordshire 1UP Scheme

Technical lead for the TIGA award winning game 'Mech Head,' In this role I was responsible for managing a GitHub of ~30 contributors over the course of 6 weeks, leading the programming team. My main contributions to the project included programming the core mechanics and game loop.

2018

Work Experience – East Suffolk Council

In this weeklong placement I supported the IT department. I worked helpdesk support fixing laptops and connecting new devices to the network and assisting in server maintenance.

Projects

The Other Side – Snappy Gurus Game Jam 2024

Chaotic ship management game created in 10 days as part of the snappy guru's summer jam, for this project I was the Lead Programmer, and my main contributions were the puzzle and interaction systems.

Game Dev Society Group Project 2024 (Ongoing)

A time swap mechanic game in the process of development created by members of the Game Development Society at University of Staffordshire, this project has over 25 members and I manage the GitHub, whilst assisting as the principal programmer.
